Course Introduction

- Complete CCNA 200-301 (v1.1) course
- Designed for beginners to intermediate learners
- Covers full networking fundamentals to core concepts
- Focus on strong practical networking skills
- Includes hands-on labs and real-world scenarios
- Based on industry standards by Cisco Systems
- Helps you prepare for the CCNA 200-301
- Structured for step-by-step learning
- Delivered in a simple and easy-to-understand style
- Completely free learning resource

Why learn Networking?

- Foundation of all modern IT systems
- Enables communication across the internet and organizations
- High demand for networking professionals worldwide
- Opens career paths in:
  - Network Engineering
  - Cybersecurity
  - Cloud & System Administration

- Essential for understanding security and infrastructure
- Builds strong problem-solving and troubleshooting skills
